### Objective

---

My desire to learn more and to innovate grew every day as I began my software engineering major. In addition to my regular classes, I enrolled in additional ones like A2SV to hone my skills. My enrollment at Africa to Silicon Valley Academy, gave me the technical know-how I needed to excel in coding competitions and work through more than 600 problems on websites like LeetCode and Codeforces. Having participated in multiple problem-solving competitions and been exposed to a variety of technical and soft skills from various computer science courses, I am certain that I am the best qualified applicant for this position. It will enable me to go farther into the innovation sector. I'm motivated to lend my expertise and commitment to a business known for its ground-breaking inventions because of this.

### Education

---

**Software Engineering**, Addis Ababa Science And Technology University ✍ 01/2020 – 04/2025  
(One of the top science and technology university in East Africa) Addis Ababa, Ethiopia

**-Relevant course work:-** Data structure and Algorithm, Database and Data Management, OOP, Networking and Security, Artificial Intelligence and Machine Learning, Mathematics and Statistics, Software Development, Programming Languages

**Competitive Engineering**, Africa To Silicon Valley Coding Academy (A2SV) ✍ 10/2022 – 10/2023  
Addis Ababa, Ethiopia

- A2SV upsills high-potential African students, connects them with top tech companies, and creates digital solutions to urgent problems in their countries.
- A2SV has placed 50+ students at top-tech companies such as Google, Bloomberg, Databricks, Amazon, LinkedIn, and Square in the last four years. I am proud to highlight that I also gained technical skills during my one-year of learning experience at A2SV

### Professional Experience

---

**Software Engineer Intern**, Creavers Software Solutions ✍ 07/2023 – 09/2023  
Addis Ababa, Ethiopia

- I worked as a mobile app development intern
- Enhanced an existing app and implemented new features.
- I gained hands-on experience with native app development for iOS and Android platforms, using flutter and dart programming language.
- I actively participated in feature development, bug fixing, optimizing app performance, and ensuring a seamless user experience.

### Skills

---

#### Soft Skills

Team Player, Good Communicator, Problem-solver, Adaptable, Time Management and Experienced Leadership skill

#### Technical Skills

Advanced Level: Flutter, Dart, Python, C++, Data Structures and Algorithms, Git and GitHub  
Intermediate Level: Java, MySQL, Data Analysis  
Beginner Level: Machine Learning and AI
